

Picksy^{Street}

Picksy^{Lite}, is a proven reliable modular cargo delivery point for storing high number and volume of packages.

- Picksy^{Lite}, is suitable for transporting up to 200 packages per day.
- For stocking higher volumes of packages, robotics-based Picksy^{Pro} series is recommended.
- Customize the product according to your needs. The final price is determined by the options you choose.

Advantages

You can choose the hardware you want in Picksy^{Lite} according to your needs.

- **Modular Architecture**
It adjusts to specific cargo volume and location requirements.
- **Secure**
Special industrial lock provides safe storage against vandalism.
- **Low cost**
Maintenance costs are reduced with remote instant technical monitoring.
- **Customizable**
Electronic, mechanical and editorial features can be configured.
- **Enhanced Customer Experience**
Customer experience is improved with a fast, secure and easy interface.
- **Saves Space**
Storage of up to 55 packages per m² can be provided.

How does it work?

Using the touch screen, the courier opens the Picky^{Lite}'s hopper and places the package.

The end user receives a notification and the delivery code for the package they will receive.

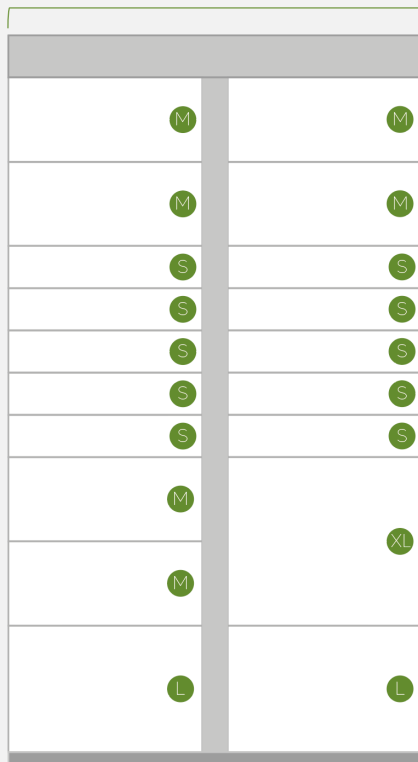

The end user enters the delivery code or scans the QR code on the Picky^{Lite} screen.

Picky^{Lite}'s chamber is opened and the package is delivered.
